

Goliath End of Line Systems Filling & Capping Systems InLine Filling

DFS Dockable Piston Filling Machine

The Digifil, or DFS, Dockable Piston Filling System accommodates a wide variety of applications as well as container shapes and sizes.

The DFS liquid filler can handle products of high (creams, lotions, mascara), moderate (detergent, syrups, shampoo), and low (alcohol, water-thin liquids) viscosities. Best suited for small to moderate fills (less than one Liter) with fill accuracies of $\pm 0.5\%$, there are multiple Piston Pump model and sizes offered.

Three frame sizes are available to handle up to 12 Piston Pumps for fill rates of 10 to 200 containers per minute. The Dockable Trolley System is a removable trolley containing the metering systems that allows you to changeover in less than five minutes.

DFS Dockable Flow Meter Filling Machine

The Digifil, or DFS, Dockable Flow Meter System accommodates a wide variety of applications as well as container shapes and sizes. The DFS liquid filler can handle products of high (creams, lotions, mascara), moderate (detergent, syrups, shampoo), and low (alcohol, water-thin liquids) viscosities. Best suited for moderate to large fills (50mL to gallons) with fill accuracies of $\pm 1\%$ or better, there are multiple Flow Meter models and sizes offered.

Three frame sizes are available to handle up to 12 Flow Meter for fill rates of 10 to 200 containers per minute. The Dockable Trolley System is a removable trolley containing the metering systems that allows you to changeover in less than five minutes. A simple fluid pathway allows for CIP (Clean In Place) or remote CIP.
