

Goliath End of Line Systems Filling & Capping Systems Monobloc

Filamatic's popular Monobloc Fill/ Finish Packaging Systems can perform a wide range of tasks such as sorting, feeding, filling, plugging, stoppering, crimping, capping, induction sealing, labelling, and accumulating.

The Monobloc is ideal for the Pharmaceutical and Cosmetic industry because it is engineered to perform multiple tasks within a compact footprint. An optional HEPA filtration system can also be incorporated to provide positive pressure airflow within the machine environment.

A variety of liquid metering systems are available to provide a fill volume range of 0.5mL to 500mL per cycle. In addition, these metering systems are capable of handling a wide range of viscosities from free-flowing to viscous products.

All Monoblocs are digitally controlled with menu-driven programs that electronically adjust operating parameters for quick and easy tool-less changeovers. A wide assortment of liquid products can be filled into an array of containers including micro tubes, cryovials, glass vials, and plastic containers.

Machine Type:	Monobloc
Metering Systems:	Piston, Peristaltic, Zero Particulate, Rolling Diaphragms
Container/Closure:	Micro tubes, Vials, Glass, Plastic, Syringes, Eye Dropper, Stoppers, Over caps, Child Resistant, Tamper Evident, Dropper Tip, Nalgene
Application:	Clinical Trials, High Volume Production, Samples, High Accuracy, Contract Packaging, Research & Development, Quick Changeover, Test Lab, Pilot Plant, Clean Room, Aseptic Filling, OEM Applications, Hotel Amenities, Cost Reduction
Industry:	Pharmaceutical, Biotechnology, Cosmetic, Healthcare, Personal Care, Chemical Specialty, Diagnostics
Product:	Viscous, Semi-Viscous, Water Thin
