

## **Goliath End of Line Automation Vertical Conveyors**

**The Prorunner MK5** is a continuous product lift with the surprisingly low price tag of a discontinuous conveyor. The module-based mk5 offers a maximum capacity of 3,000 products per hour and is particularly versatile.

This energy-efficient product lift can be used to effortlessly and quickly transport a wide variety of products, including boxes, cases, trays or bags, to and from any height you require. The product is always shipped in an upright position to prevent product deformation.

What is more, the elevator system can be used for both ascending and descending product flows and is even suitable for use as a vertical sorter. This low-maintenance, carefully designed product lift is available at a fixed price, inclusive of infeed and outfeed conveyors and safety fencing.

**The Prorunner MK1** is a discontinuous product elevator that excels in robustness and requires minimal maintenance. Its steel structure is extremely stable under all circumstances.

By using a flat belt the Prorunner MK1 is completely silent in its movement. Moreover, a flat belt of this type almost has no maintenance. No lubrication and tension in comparison to chain driven system is needed anymore.

### **Efficient vertical transport**

The lift can easily hoist boxes, trays, boxes, crates, boxes or bags weighing up to 100kg lift. The Prorunner MK1 is ideally suited for applications where maximum capacity of approximately 300 movements per hour is needed. Its compact design uses relatively just little floor space.

All this together makes the Prorunner MK1 an extremely efficient and economical solution for your vertical transportation.
