

Goliath End of Line Automation Strapping Systems

We supply and install a range of six fully automatic strapping machines which, between them, offer such features as a range of arch sizes and capacities that range from 18 to 40 packs or bundles per minute.

All are designed to be easy to operate and several of these strapping machines have found particular favour in the very demanding environment of the graphics industry where sealing heads that can run for 24 hours a day, 7 days a week but require minimum maintenance are a particular asset

ST1 Automatic Strapping Machine

- Fully automatic strap feed whilst standing
- Patented bundle / pack height detection with automatic stepless adjustment of strap tension
- Jog Dial control for simple operation
- LCD text display
- Fault tolerant strap drive (machine automatically resumes strapping after a strap fault)
- Patented flap track virtually eliminates strap twisting
- Electrical coil brake
- Strap end detection system - automatic discharge of remaining strap
- Bundle / pack press with adjustable press-limitation - optional
- Strap width 5 - 12mm (5 - 9mm adjustable with no additional parts)
- Strap cutter
- Strapping of low packs on low tension possible with unique strap ejector
- Strap loop ejector (no jam if machine is operated with no bundle / pack)
- Table belt drive steplessly adjustable (frequency converter)
- Modular construction for optional retrofitting
- Fume dissipation fan
- Height adjustable (775mm - 900mm)

TM01 Fully Automatic Strapping Machine

The fully automatic strapping machine TM 01 convinces by maintenance free direct drives and simple operation.

- Strap capacity up to 30 single straps and 15 parallel straps per minute
- Strap width from 5 to 12 mm
- Bundle size W x H max. 600 x 500 mm

Suitable for operation with bundles of newspapers, magazines and commercial printers
